

ABSTRACT

AMINOALKYL SUBSTITUTED (BENZODIOXAN, BENZOFURAN
5 OR BENZOPYRAN) DERIVATIVES

The present invention concerns compounds of formula (I)

a stereochemically isomeric form thereof, an *N*-oxide form thereof or a pharmaceutically acceptable acid addition salt thereof, wherein $-Z^1-Z^2-$ is a bivalent radical; R¹, R² and R³ are each independently selected from hydrogen, C₁-6alkyl, hydroxy, halo and the like; or when R¹ and R² are on adjacent carbon atoms, R¹ and R² taken together may form a bivalent radical of formula; Alk¹ and Alk² are optionally substituted C₁-6alkanediyl; R⁶ is hydrogen or phenylmethyl; R⁵ is a radical of formula

20 wherein n is 1 or 2; p¹ is 0, and p² is 1 or 2; or p¹ is 1 or 2, and p² is 0; X is oxygen, sulfur or =NR⁹; Y is oxygen or sulfur; R⁷ is hydrogen, C₁-6alkyl, C₃-6cycloalkyl, phenyl or phenylmethyl; R⁸ is C₁-6alkyl, C₃-6cycloalkyl phenyl or phenylmethyl; R⁹ is cyano, C₁-6alkyl, C₃-6cyclo-alkyl, C₁-6alkyloxycarbonyl or aminocarbonyl; R¹⁰ is hydrogen or C₁-6alkyl; and Q is a bivalent radical. Processes for preparing said products, formulations comprising said products and their use as a medicine are disclosed, in particular for treating conditions which are related to impaired fundic relaxation.
